

.....**Hey**.... you should write the conversation that you had 10 minutes ago: we were walking after having seat in a bar,...listen, I've just phoned Klaus:....(phoning with Klaus)... two days ago we received an invitation to make a poster..., and the text for the catalogue should be ready tomorrow...I was thinking...the **patent**...I don't know ... silence...I spoke with Haidulf too ... some pages from our cooperation for the last biennale, ..... and then (Oskars came in the room:-..Hey this room is completely full....I will go for a walk five minutes,)... ..OK, ...then, next week we can meet,....I could do some engineering sketch Klaus says

...  
Mmm...(phoning Thomas Bayrle)...I am out there in the forest...birds are singing...mushrooms a growing...and hips are swinging...just through a stone into a text...and find another text below...

some weeks ago - during a rather boring birthday party for Wolf Singer in the Max Planck Institut -I went into the basement to see Walter Hofer (artist)who runs the Electronic Microscope since 20 years...One could see a 20.000 times enlarged synopsis in a rats eye... - I could see Molecules and Atoms!...O boy...From the bottom to the top this world is beautiful! Unbelievable - 4 calcium Atoms - just dropped into a Molecule in front of my eyes...

What a perfect world! These are those binding -qualities in-between different cells -Singer always relates on - The miracle of brain -always different coalitions - for each thought...each action...game...Special combinations of different cells for anything.....programmed by special amounts of Atoms here...and other ones over there...

While watching this dimension I thought Chickenburger 1,99?...Is this really everything and for ever fine?

To me this was very reassuring - I went upstairs into the crowd of chicken swallowing scientists -and had a beer!

...Christine was busy,.... I left a message that she should phone me,...., you could show her e-mails ...when we got in contact with **Cabot**, ...Hey!, and, Gyula...si,.... but I've spend already 15 euros in phone calls...we could write when he came at the "**Unit space**", ok, ok, or.... You remember....in his studio ... he was speaking French,..... Without utopia we can not live...When utopia is over the world is over. I am still thinking about that,...we should try at least, ... hey ? Yesterday with the **lawyer**;.... we have to renovate the patent....., then we will extend the rights one and a half year more, ...he is super... we should persevere like Peter Cook, says. Ok that's it: The poster should show the relationships... in one corner will be the project of the flying city with **LTA** with Klaus and the flyer, in the other meeting net, here, the application of the patent with **HIV mobile clinic for Africa**, aha.... ok then.... the poster could be like a newspaper,... I could ask Thomas to do it together, with his lay-out..... and then the news are the projects, ... aha... and with Sven: **the memorial** ... yeah that's it,... at the end is ok;... the projects are about meeting, **meeting space**, **meeting Net**, **Meeting Point**, **Line**...ha-ha... this is super I should tell Boba, I liked it,...

I came back and I started to write ...In the end that is utopia, all this people - seating around thinking, isn't it? But the thing is that they are all really nice, Natalija Miodragovic said before leaving.

I hope this will be ok, although there are no images, this could make an image at the end, couldn't it?

Humanity's new frontier can not be understood if the development do not include the compromise with the social systems that we are involving. We should guaranty like a server the circulation of information in a fluid collaboration that preserves individual perceptions.

**LTA- Lighter Than Air-Art-Architecture** : An informal group which believes that we will be able to build and inhabit the air, space, with Christine Bärthaler (Arch.-independent curator), Klaus Bollinger (Bollinger & Grohmann engineer office), Haidulf Gerngross (Arch. Vienna) Natalija Miodragovic (Arch. Belgrade) Odysseus Kleisouras (Artist Greece) Nicolas Cappelli (Arch. Argentina)

**Meeting Net** Fragmented communication: "streets lights beamer" provide light from videos beamer projecting images via internet in different public spaces of cities, making possible in this way to communicate people-art-events- on line around the world- a first terminal will be located in Frankfurt, like a window for Städelschule with Thomas Bayrle (Artist Germany)

**HIV mobile clinic for Africa**: Architectural for Humanity, a flying "condom" with the application of the LTA research, With Natalija Miodragovic (Arch. Belgrade)

**Meeting Line**: Moving gallery in public bus line N° 7 in Belgrade with Boba Mirjana Stojadinovic (artist Belgrade)

**Unit space**: Foundation of the "unit space" proposing to "build a relationship beyond the atmosphere", with Veronica Morelo (Arch. Argentina) Maria Cohen (Arch. Argentina.)Sebastian Pettis (Graphic Design Argentina) Sergio Forster (Arch. Argentina) and all students, at the Universidad de Arquitectura y Urbanismo Buenos Aires.

**Memorial** to victims of the September 11, 2001 Pentagon, Ten public telephones that will be located over the memorial site making possible to receive or make a phone calls for free, connecting different people around the world with problems of communications-like -Washington Kabul-NY Baghdad, with Sven Pfeiffer (Arch. Germany).

**Cabot**: Wi Pack, Porexterm ... companies which are cooperating with the realization of the solar meeting space.

**Patent N° 202 06 527.8** SAR 7940 GM. Patented for a new skin and structure for sun energy driven flying objects. Lighter Than Air vehicles will fly in the air only with solar radiation. It is proposed that this innovation will revolutionize the use of the air; a new art/architecture will begin, Author, Tomas Saraceno with Lawyer: Patentwälte Beyer & Jochem, Engineers: Bollinger & Grohmann engineer office

**Air-Port City: -Meeting spaces**

Through no method known to modern astronomy until recent times, it has been possible to discover a living planet like the earth among the stars nearer to it. But could some activities within the scope of rational beings make it possible for others to see us? Carol Sagan Journey from personal to collective believe is the first step of realization Lighter Than Air invites You to improve the critical mass and personalize the possible living structures on the air. A "migration-in" (emigration immigration), being "in" without actually being, like airports in different courtyards. After the union of Europe, an "europeanafroamericanasia noceumadfvdsdf" will be built; as in the beginning of the world the continents will find their position on the air; to then understand our position in the universe.

"AROUND THE WORLD WITHOUT A PASSOPORT. I will assume my role as an INTRERNATIONAL POLITICIAN (and with those who may wish to join me in this enterprise) will attempt to fly around the world without official sanctions expecting to raise the issue of UNIVERSAL CIVIL LAW "replace militarily imposed division. The tentative itinerary it is: Warsaw, Poland; Moscow, Ulan Bator, Mongolia; ...Based on "mission to Baghdad" by John Running. To address the meeting space please contact us at meetingspace@yahoo.com Hopefully, we will start to fly.
